

Upgrading From agisNavi 2.0/NAVFone 2.1 To NAVFone 2.11

4 easy steps:

- 1) Backup license & waypoints files
- 2) Removal of previous version
- 3) Download and Install NAVFone 2.11
- 4) Restore license & waypoints

1) Backup license & waypoints:

- Step 1: A Window PC and a memory card reader are required.
- Step 2: Remove the memory card from the Windows Mobile device.
- Step 3: Insert the memory card into the memory card reader.
- Step 4: In Windows Explorer on the PC, goto the "Memory Card\agisNavi" folder.
- Step 5: Locate the "agisnavigator.lic" and "favorite.way" files from this folder.
- Step 6: Copy & paste the files above to the Desktop on the Windows PC.
- Step 7: Done.

2) Removal of previous version:

- Step 1: A Window PC and a memory card reader are required.
- Step 2: Remove the memory card from the Windows Mobile device.
- Step 3: Insert the memory card into the memory card reader.
- Step 4: In Windows Explorer on the PC, goto the "Memory Card".
- Step 5: Delete the "agisNavi" folder.
- Step 6: Done.

3) Download and Install NAVFone 2.11:

- Step 1: Download the NAVFone 2.11 installer to the Windows PC from the URL below;
http://www.agisdownload.com/download/navfone_ppc/NAVFone211/NAVFone_PPC_211.SGMY.CAB
*included Singapore and Malaysia Data
- Step 2: Remove the memory card from the Windows Mobile device.
- Step 3: Insert the memory card into the memory card reader.
- Step 4: In Windows Explorer, copy & paste the downloaded file NAVFone_PPC_211.SGMY.CAB into "memory card".
- Step 5: Insert the memory card back into the Windows Mobile device.
- Step 6: From the Windows Mobile device, tap on "File Explorer" > "memory card" > "NAVFone_PPC_211.SGMY.CAB"
- Step 7: The installation process will begin.
- Step 8: **MUST** select the **Storage Card** as the installation location when prompted.
- Step 9: Done.

4) Restore license & waypoints:

- Step 1: A Window PC and a memory card reader are required.
- Step 2: Remove the memory card from the Windows Mobile device.
- Step 3: Insert the memory card into the memory card reader.
- Step 4: From PC Windows Explorer, goto the "Desktop".
- Step 5: Locate the backup file "agisnavigator.lic" and "favorite.way" files. (see **Backup license & waypoints** step 6)
- Step 6: Copy & paste the files above to the "Memory Card\agisNavi" folder.
- Step 7: Start NAVFone via Start Menu > Programs > NAVFone PPC.
- Step 8: Done.
